The Conference

The guiding theme of the conference is to put the concerns of Natura 2000 into a regional economic context. Furthermore the results of the project *AlpNaTour* – Natura 2000 and tourism - will be presented. The main issue of the conference is the implementation of Article 2 of the flora-fauna-habitat directive. Thus, the consideration of socio-economic concerns and regional characteristics in the context of management planning processes for Natura 2000 sites in the alpine space. Presenting different examples it will be shown on the one hand how regional economic aspects can be integrated into management planning and on the other hand how cost-efficient concepts for management planning and implementation can be followed.
